REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed device is an interdigital capacitor formed around a bond pad and having a resistive wiring under the capacitor in one embodiment and in another the resistive wiring is in a lower layer. Ohtali et al. show an interdigital capacitor (Figures 19, 23) but the capacitor is not around a bond pad and there is no resistive layer. Kabuki shows an interdigital capacitor (Figure 7, 9) but again it is not around a bond pad and there is no resistive layer. Similar remarks hold for Haruki. Thus the claimed device is not shown in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
